

RB Series Flexographic Ink

【Product description】

RB series is alcohol solvent based flexographic surface print ink for sanitary product and shopping bags.

【Suitable substrate】

Treated PE film and non-woven fabrics.

【Product feature】

- ❖ Toluene, xylene, Ketone free
- ❖ Good drying performance, low residual solvent, low odor
- ❖ Good anti blocking, smooth, good re dissolvability, suitable for high speed printing
- ❖ Good colour saturation and strength
- ❖ Good printing performance on shallow and deep printing cell

【Printing viscosity】

- ❖ White: SHEEN3# 14-20 seconds, 25 °C
- ❖ Colour: SHEEN3# 18-25 seconds, 25°C

【Dilution】

Drying speed \ Solvent	Fast	Medium	Slow
Ethanol	100	80	30
n- propanal	-	-	30
Propylene glycol monoethyl ether	-	20	40

【Precaution】

- ❖ Shake well before use to ensure consistent flow;

- ❖ Ink performance might differ with different printing condition and printing substrate, first time user should assess ink performance before production.

【Disclaimer】

This specification is in accordance with the actual production and test results, but whether the product could meet the requirements of your plant, depends on the specific application conditions and the printed material. We recommend that the users need to understand each product whether meets all requirements of their own before start of printing, because we cannot predict or control your product using condition, the product performance cannot be guaranteed, all sales are subject to the standard terms and conditions of the sales control division.
